

# Health Decentralization Bulletin

**Health Decentralization Bulletin** have been published since year 2001. This bulletin is published by the initiative Center for Health Service Management (CHSM), Faculty Of Medicine, Gadjah Mada University in order to support implementation of the health decentralization policy in Indonesia. As we know, applying the health decentralization policy brings the big change in governance system in the center, province and district/municipality level. The changes in strategies that have been applying in health decentralization policy is different between areas. However, the experiences in conducting changes, whether succeed or not, should be communicated. Thus, those experiences could be something to learn. This bulletin is a media for communicating and sharing.

## Who Is Our Reader?

This Bulletin circulate among organizer program in district/municipality health office, province health office and hospital, decision maker in ministry of health and province health office, district authority and governor, public and private institute of health education, and also international institutes which are related to health.

## Contents

We raise “management and health policy in district, province and national level” as the theme of this edition. Peculiarly, this focus at program innovation in service of health and public health, and also the supports and barriers in bureaucracy, economic and political context, and public development.

## Time of Publishing

This Bulletin is published by publishing division of CHSM every 3 months. The 3<sup>rd</sup> volume in this year will be published in early December 2004. The date line for the contributor is last week of October 2004.
